Author index to volume 280

Bazgan, C., A note on the approximability of the toughness of graphs	(1–3) 215–218
Chen, P., see G. Ding	(1–3) 1– 12
de Graaf, M., Directed triangles in directed graphs	(1–3) 219–223
Deutsch, E., Enumerating symmetric directed convex polyominoes	(1–3) 225–231
Ding, G. and P. Chen, Unavoidable doubly connected large graphs	(1–3) 1– 12
Fujishige, S., K. Makino, T. Takabatake and K. Kashiwabara, Polybasic polyhedra: structure of polyhedra with edge vectors of support size at most 2	(1–3) 13– 27
Gonçalves, A. and E.L. Monte Carmelo, Some geometric structures and bounds for Ramsey numbers	(1–3) 29– 38
Grynkiewicz, D.J., On some Rado numbers for generalized arithmetic progressions	(1–3) 39– 50
Healy, P., A. Kuusik and S. Leipert, A characterization of level planar graphs	(1–3) 51– 63
Kang, L., see E. Shan	(1–3) 265–269
Kashiwabara, K., see S. Fujishige	(1–3) 13– 27
Kaski, P. and P.R.J. Östergård, Miscellaneous classification results for 2-designs	(1–3) 65– 75
Kuusik, A., see P. Healy	(1–3) 51– 63
Leipert, S., see P. Healy	(1–3) 51– 63
Lemos, M. and J. Oxley, On the minor-minimal 2-connected graphs having a fixed minor	(1–3) 77–118
Lichiardopol, N., Concerning two conjectures on the set of fixed points of a complete rotation of a Cayley digraph	(1–3) 119–131
Loehr, N.A., Note on André's reflection principle	(1–3) 233–236
Lou, D. and D. Rao, Graphs with no M -alternating path between two vertices	(1–3) 237–240
Makino, K., see S. Fujishige	(1–3) 13– 27
Malnić, A., D. Marušić, P. Potočnik and C. Wang, An infinite family of cubic edge- but not vertex-transitive graphs	(1–3) 133–148
Marušić, D., see A. Malnić	(1–3) 133–148
Matsuda, H., Degree conditions for Hamiltonian graphs to have $[a, b]$ -factors containing a given Hamiltonian cycle	(1–3) 241–250
Monte Carmelo, E.L., see A. Gonçalves	(1–3) 29– 38
Nicoloso, S., Sum coloring and interval graphs: a tight upper bound for the minimum number of colors Dedicated to Prof. Mario Lucertini, who taught me Operations Research	(1–3) 251–257

Östergård, P.R.J., see P. Kaski (1-3) 65– 75
Oxley, J., see M. Lemos (1-3) 77–118

Pelayo, I.M., Comment on "The Steiner number of a graph" by G. Chartrand and P. Zhang [Discrete Mathematics 242 (2002) 41–54] (1-3) 259–263
Potočnik, P., see A. Malnič (1-3) 133–148

Rao, D., see D. Lou (1-3) 237–240

Schröder, B.S.W., More examples on ordered set reconstruction (1-3) 149–163
Shan, E. and L. Kang, A note on balance vertices in trees (1-3) 265–269
Spinrad, J., see Van Bang Le (1-3) 271–274
Stankova, Z. and J. West, Explicit enumeration of 321, hexagon-avoiding permutations (1-3) 165–189
Steffen, E., Measurements of edge-uncolorability (1-3) 191–214

Takabatake, T., see S. Fujishige (1-3) 13– 27

Van Bang Le and J. Spinrad, Consequences of an algorithm for bridged graphs (1-3) 271–274

Wang, C., see A. Malnič (1-3) 133–148
West, J., see Z. Stankova (1-3) 165–189
